Vision

Lead 01

To be a leader in the fields of activity, in a respectable & honest manner

02

Core

To focus on core businesses, while catering for the needs of the customers and market requirements.

03

Pro

To provide a solution to customers' application needs through know-how, expertise and the introduction of new products and technologies of premium quality.

04

Aim

To encourage new developments, initiatives and technologies while maintaining and developing the company's existing activities .

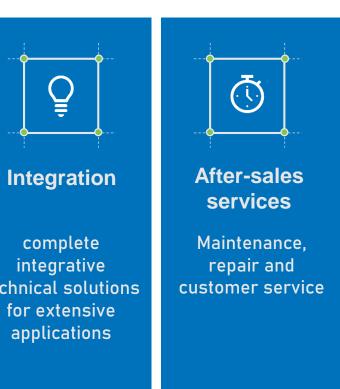

About Radion

Radion Engineering Co. Ltd was established in 1947, before the establishment of the State of Israel, as a representatives' company.

Radion Electronics, as part of Radion Engineering Ltd., is acting as the exclusive representative for several of the world's leading electronic manufacturers.

Field of Activity

Heat & Power

Industrial
Equipment, Marine
and offshore Heat &
Power components,
systems and
projects.

BMS Control

Controls and Systems for Building Management (DDC) Systems.

Drives & Instrumentation

Frequency

converters, Soft starters and Instrumentation. Variable Speed Drives, Flow Meters Energy Meters

Refrigeration & Air-Conditioning

Components,
Controls and
systems for Heating,
Ventilation, Air
Conditioning and
Refrigeration
Systems.

Projects for Industry

Electronics
electronic
components and
subsystems for a
variety of
applications

Resources

ISO 9001-2000 certified since 1999 ISO-13485 certified since 2014

Yearly planned training program and monitoring system

Main office building in Petah-Tikva, in the vicinity of Tel-Aviv, housing the headquarters, storage, laboratory, customer support & training center (4 stories 1,000 m²).

Additional Manufacturing & Storage facility (700m²) in the North of Israel

25 Sales Engineers

20 Customer service

12 Office administrative positions

MARCOM, Accounting, ERP, IT, HR, Logistics, Production, Supply Chain & Management

Smart Healthcare Solutions

Smart View Medical Solution

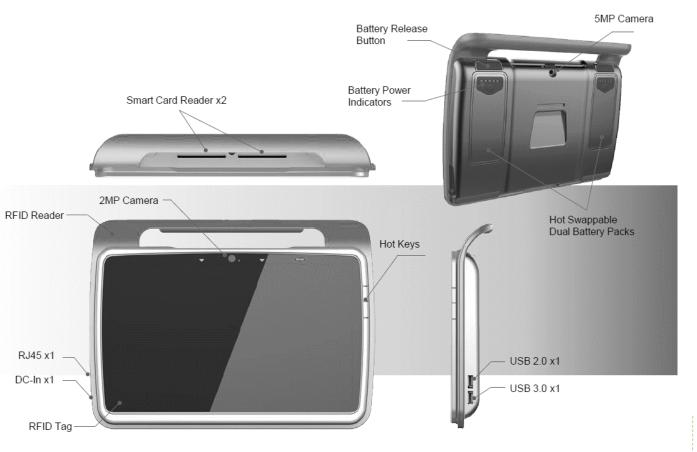

Mobile Tablet PC

Inspired by Paramedics-Designed for EMS

Designed for Acute-Care

Dual Smart Card Readers free up the paramedics from frequently exchanging ID cards so they can focus more on acute patient care.

One-Handed Operation

The MD116 can be easily docked and released by one hand with our patented vehicle docking system. So that, the tablet can be carried to the scene in a second.

Easy-Grip Handle

The handle's ergonomic design makes the MD116 easy to hold while the elastomer coating prevents the tablet from slipping out of the hands.

Custom OEM

Medical Connectivity Solutions

Proven quality and innovative connectivity solutions

- Surgical Robots
- Surgical Equipment
- •Hybrid Operating Room
- Endoscopy
- Infusion Pumps
- Patient Monitoring
- Dental Tools Chairs
- Portable & Wearable Devices
- Home Health Monitors
- Automated External Devices

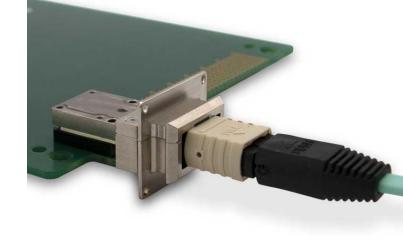

Imaging Systems

- Resonance Imaging (MRI)
- CT Scanning Systems
- Digital X-ray
- Ultrasound
- Position Emission Tomography

Disposables

- Electrophysiology Catheters
- Invasive Probes
- Painless Needle Systems
- Blood Gas Analyzers

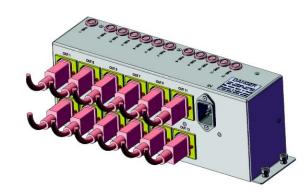

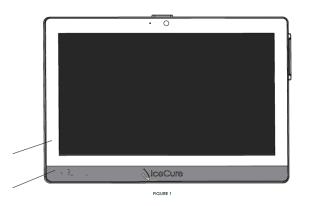

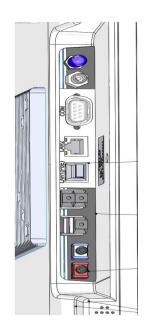

Medical Assemblies

Integration of Products

Radion offers a wide range of tailor made solutions to handle the embedded computing tasks for diverse applications.

The solutions offered can consist of a wide variety of components including:

embedded single board computers, LCD Monitors and Panels, Touch Screens, Power supplies, various inputs and outputs and embedded/standard operating systems. All platforms are integrated and tested in our laboratories.

Integration of products

Integration of LCD and SBC

integrating LCD Panel, obtained through Radion or a third party, with the single board computer selected for the computing platform.

BIOS modifications, LCD cable definition (TTL or LVDS), manufacture a sample of the LCD cable and finally test and validate the offered solution.

Integration of Power Supply and SBC

wide variety of Power Supplies for dedicated markets, for an embedded computing .the most suitable power supply for the application based on measurement of the complete platform power usage, mechanical constraints, marketing and regulatory constraints.

Touch Screen Integration

integrate touch screen based on a list of requirements such as technology, optical performance and durability with the entire platform. A compatible controller will be defined, and the solution will be validated with the single board computer and LCD panel.

Specialized Cases

Some applications require the design and production of a specialized chassis or the modification of an existing one, in order to accommodate all components and requirements. Radion can design a specialized chassis, based on your specific application and market needs. Radion can produce sample quantities and mass-produced quantities of the final designed case.

BIOS Modification and Customization

As each application has unique specifications and requirements, Radion acknowledges that some modifications are required to the system or individual component BIOS for each application. Radion can perform the requested BIOS modifications in order to customize the solution for the specific application

Definition and Manufacturing of LCD Cable

mass-produce the LCD cable, defined in the integration phase, between the

single board computer and the LCD panel.

ISO Certificate

All certificates we had included quality standard certificate to make sure that customer received high quality products
